DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The James Silver House is a 2½ story frame house with a two story wing located on the east side of Priestford Road (MD 136) across the road from Trappe Church (HA-166), about two miles north of Deer Creek near Darlington in Harford County, Maryland. The house was built in 1870 and faces south.

The main section of the house has a central hall plan and an irregular south or main elevation. The south elevation has a projecting eastern bay with a polygonal bay window on the first floor. A one-story porch with scroll-sawn brackets shelters the double-doored entry with sidelights and transom. A single gabled dormer breaks the roofline. The west elevation is the gable end and has a two-story polygonal bay. The north elevation is a five-bay, central entrance facade with a steep central dormer and smaller dormers flanking. The small dormers have a scroll-sawn floral bargeboard. The dormer window frames are pointed. The central doorway is presently closed off. An early 20th century photograph in the possession of the owner shows that there was originally a flat roofed porch with elaborate brackets on this elevation. It was removed in the late 1930's or early 1940's, but some of the bracketed columns were retained and are stored in the barn. The porch was very similar to that on the Janney House at Indian Spring Farm (HA-341).

The east wing is also 2½ stories, but lower in height than the main section. This was the original servants' quarters and kitchen, and is now a separate rental apartment. The wing has two bays on all exposed elevations and an enclosed shed porch on the east end. Two dormers on the south elevation have round-arched windows.

The fenestration of the house is as varied as its exterior: most windows have four over four sliding sash, but several new windows, particularly in the east wing, are six over six or two over two. On both the north and south elevations, the west bays on the first floor have tall narrow ten-light windows opening from the former ballroom.

The foundation of the house is stone. The original weatherboard siding has been covered with asbestos shingles. The roof was originally red painted metal but has been replaced by asbestos roofing material.

The interior has been largely altered, but much of the original woodwork, mantelpieces, and some decorative plasterwork remains intact. The former ballroom has some finely modeled plaster corbels and a black marble mantel. The central hall has a plaster ceiling medallion. The oak staircase and balustrade extend the full height of the house. The area of greatest alteration is on the third floor where several new walls were added when a rental apartment was put in.

Several agricultural outbuildings are located east and southeast of the house. Of these, only the frame garage and bank barn directly east

SPECIFIC DATES 1870

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The James Silver House is a good example of vernacular architecture in the Victorian period, showing elements of decoration and planning based in the Queen Anne, Stick, and late Gothic Revival styles. The house is also significant as one of the several Silver family houses in the Deer Creek area, most of which display a high quality of exterior and interior workmanship.

History:

James Silver (1812-1876) was the brother of Benjamin Silver, Jr. and Dr. Silas Silver, whose houses are located on Harmony Church Road (see HA-398-406 and HA-407-408). He purchased the farms of James W. Williams and James Lee, forming Silvermount Farm, a tract of 250-300 acres (see plat). The house was begun on June 8, 1870 and the Silver family moved in on December 16.

The Martenet Map of 1878 and the Jennings and Herrick Map of 1858 both show a structure labeled "J. Silver" somewhat to the south of the Silver House. This location is incorrect if this referred to the existing Silver House. The J. Silver house may be that described in HA-340 as either Silverdale or the J. C. Nelson House. Since the James Silver House was completed long before the Martenet Map was published, the incorrect location of this very prominent building is unexplained. The James Silver family may have lived in the Silverdale or Nelson House or in the demolished Hopkins House prior to the completion of Silvermount.

7. DESCRIPTION--Continued

appear to be contemporary with the house. The garage may have originally been a carriage house. It has tongue-in-groove siding on a concrete block foundation. An open tractor shed has been built on the east side of the garage. The barn is a bank type with a stone foundation, board and batten and vertical board siding, and a metal roof with standing seams. The interior structure reveals hand-hewn timbers and pegged mortise and tenon joinery.

About 100 feet northeast of the barn are the unexposed foundations of an earlier house, which according to the owner was the Hopkins house. The 1858 Jennings and Herrick map and the 1878 Martenet map show G. W. Hopkins and William Hopkins, respectively, as owning houses near this site.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)				
<p>Charles Dierdon still farms their large place but has given up his dairy herd ("not sufficient milk"). Rental of apartments in this large house to workers at Aberdeen indicate, again, dependence on these military bases (Edgewood, Aberdeen and Bainbridge). In Harford's economy, view south and east over Deer Creek Valley is very beautiful.</p>
